### 7.2. Best Practices

**7.2.1 Describe two best practices successfully implemented by the Institution as per NAAC format provided in the Manual.**

#### Best Practice – I

#### Moral & Deeniyath Education

##### Objectives:

To instill ethical values and foster social responsibility

To enhance character development

To help pupils become well-rounded individuals and to develop them to perfection

To foster the student's uniqueness through helpful, practical, and the technique and purposeful substance of moral instruction.

To use natural resources wisely and to safeguard, conserve, and preserve the natural and cultural environment

To give pupils the ability to discriminate between right and wrong, good and bad, and to develop the mental acuity and disposition necessary to act morally upright and morally upright.

##### The Context:

Education without morals is perilous. Moral & Ethics have always been the prime aim of education at Jamal Mohamed College. The mission of the college is to offer quality education, inculcating and nurturing ethical, spiritual, moral and human values. Hence, it was in the thought of the members of the College Management Committee to introduce moral education to all the students of the college.

The pressures of modern-day society, such as peer influence, social media, and the competitive nature of academics and careers, often lead to ethical dilemmas and a lack of clarity regarding right and wrong. Moral education helps students navigate these complexities by teaching them core values like integrity, respect, responsibility, fairness, and compassion.

## Criterion VII - Institutional Values and Best Practices

### 7.2. Best Practices

#### 7.2.1 Describe two best practices successfully implemented by the Institution as per NAAC format provided in the Manual.

##### **The Practice:**

Moral instruction is a compulsory course open to all UG and PG students of the college. For the effective dissemination of good values and ethics, the students are clustered into various groups according to their year of study. For all men students the moral instruction classes are held on every Thursday after the end of their regular class hours. For women students the classes are offered on every Friday after the regular classes. All students, both men and women are instructed well in advance about the purpose of the course and the venue of their class.

The Centre for Human Excellence has designed a detailed curriculum for Moral Education with 12 lessons (level 1) for first year and thus for second year (Level 2) and for third year (level 3) were made available with various select topics. Textbooks for all the three levels of study were carefully scrutinized and they have been passed in the college general Academic Council. These moral instruction books are distributed to all students for reference.

Every week, students who are clustered into various groups are taught by different moral instructors to avoid the boredom of the same style of instruction. Attendance is compulsory for all students and absentees will be intimated to the parents.

##### **Evidence of Success:**

At the end of the required number of moral instruction hours (12 Class), students have to appear for a competitive examination. The first three rank holders in each paper are given cash prizes on the day of Meeladunnabi function. The department from which the first rank holder hails would be awarded the Hajee. M.N.P. Rolling Cup. The certificates are issued to those students obtaining 60 marks and above in the examination.

Feedback from our institution's students and graduates indicates that moral education helped them discover the correct course in life. It helped them cultivate and consider their values and their ability to make moral decisions. They also demonstrated how moral education foster

responsible attitudes toward others by fostering an understanding and appreciation of the worth of every individual in a multicultural community. In order to give students more in-depth, pleasurable, and engaging experiences, it is also noted that Moral Education experiences and results promoted connections with other curriculum areas. These encounters greatly aided in the growth of the abilities of effective contributors, self-assured people, responsible citizens, and successful learners.

#### Problems encountered and resources required:

The biggest issue is student absenteeism; as moral education goes outside the parameters of the standard curriculum and are not recorded on grade sheets, students often exhibit a lack of interest in these courses. In addition to the standard teaching activities, the institution must set aside extra instructional hours for teaching and evaluation.

#### **Best Practice – II**

#### **Students' Conclave**

##### **Objectives:**

- To foster critical thinking and innovative ideas among students.
- To encourage students to present research papers, ideas and projects.
- To provide a platform for interdisciplinary exchange of knowledge and skills.
- To improve communication, presentation and public speaking skills.
- To enhance leadership, teamwork and decision –making abilities.
- To expose students to problem-solving in real-world scenarios.

##### **The Context:**

In the dynamic world of education and innovation, students are at the forefront of shaping future paradigms. A Students' Conclave serve as a vibrant platform where academic curiosity meets real-world challenges, enabling students to transcend traditional learning boundaries. By bringing together students from diverse backgrounds and disciplines, the conclave provides opportunity for them to exchange ideas, showcase talents and engage with experts in various fields.

##### **The Practice:**

The Centre for Research has organized **Students Conclave** as part of the celebrations of National Science Day 2024 held on February 28th, 2024. The event aimed at refining the presentation skills of the students. Though conclave is open to all students, the final year Post Graduate Students are encouraged to present content related to their PG Project Work so as to enhance their research skills. In this connection students are asked to submit an abstract of a maximum of 250 words that should highlight the study of their project, its aim, objectives, experiment methods, major and minor findings and conclusion. They are also instructed to make power point presentation covering all aspects of their project. Students from various

disciplines are categorized into five clusters to make their presentation at five different venues. A team of Faculty members from various disciplines are designated at the five different venues to evaluate the presentation of the students and to give suggestion for the improvement of their presentation.

#### Evidence of Success:

The conclave was held over for two day from 27.02.2024 to 28.02.2024. An overwhelming number of 300 enthusiastic students from UG and PG classes have participated in the conclave and made it a grand success. After evaluating all the presentations of the students, the best three presentation from each venue was awarded cash prize along with certificates. Besides, all participants were given participation certificate in recognition of their efforts to take part in the event. This Students' Conclave has made a positive impact among students and exposed the talents of their fellow classmates.

#### Problems encountered and resources required:

Though the institution has arranged all the necessary facilities for the arrangement of the programme, financial constraint was felt in distributing the prizes and cash awards to the participants and best performers. At the same time grouping students and ensuring the diversity of content was an issue. Though the programme was held over for two days, it was very difficult for the faculty members to witness all presentation and come up with results.
