 Member, IPR Cell &
 Asst. Prof of Botany
Dr. G. Hema Sindhuja
 Member, IPR Cell &
 Asst. Prof of Chemistry

An intellectual property right is an umbrella term that includes patents, copyrights, trademarks, design registrations, trade secrets and geographical indications. Research and Innovation in our country emerge from industry and academic institutions. In tune with present trends where intellectual property rights are globally enforceable, we need to develop an environment where we can impart knowledge of patents, copyrights, geographical indications and other IPRs to the younger generation so that they can equip themselves to create innovations and can protect their intellectual property rights. The IPR cell of our college provides a basic knowledge of patent concepts and procedures for filing patents at national and international levels. It advises making trademarks, copyrights, brand names etc. It provides a platform to share and discuss the latest developments and is helpful for local innovators including faculty members, students and research scholars.
