

DEPARTMENT OF ECONOMICS

COURSE STRUCTURE & SYLLABI (For the students admitted from year 2023-2024 onwards)

Programme : M.A. Economics

JAMAL MOHAMED COLLEGE (AUTONOMOUS)
Accredited with A++ Grade by NAAC (4th Cycle) with CGPA 3.69 out of 4.0
(Affiliated to Bharathidasan University)
TIRUCHIRAPPALLI – 620 020

M.A. ECONOMICS

Sem	Course Code	Course Category	Course Title	Ins. Hrs/ Week	Credit	Marks		Total

Semester	Course Code	Course Title
I	23PEC1DE1A	Mathematical Applications in Economic Analysis
	23PEC1DE1B	Financial Economics
II	23PEC2DE2A	Statistical Methods for Economic Analysis
	23PEC2DE2B	Agricultural Economics
III	23PEC3DE3A	Econometrics
	23PEC3DE3B	Personnel Management
IV	23PEC4DE4A	Industrial Economics
	23PEC4DE4B	Islamic Banking

Semester	Course Code	Course Category	Hours/ Week	Credits	Marks for Evaluation		
					CIA	ESE	Total
I	23PEC1CC1	Core - I	6	5	25	75	100
Course Title		Advanced Micro Economic Analysis - I					

SYLLABUS		
Unit	Contents	Hours
I	Demand Analysis Utility Theory – Cardinal & Ordinal approach – Indifference Curve analysis and its applications – Revealed preference theory – *Hicks Revised demand theory.*	18
II	Theory of Production Production function - short period and long period; law of variable proportions and returns to scale; Iso – quant – least cost combination of inputs; Euler's theorem –Technical progress and production function; Cobb-Douglas and CES production function – *Traditional and Modern theory of cost*	18
III	Price – Output Determination Perfect Competition – Monopoly – Price discrimination – Monopolistic competition – *Wastages of Monopolistic competition*	18
IV	Oligopoly Models Collusive Oligopoly and Non-Collusive Oligopoly – Cournot's Duopoly – Bertrand's duopoly Model – Chamberlains' Oligopoly Model – Kinked demand Model – Stackleberg Model – Cartels – *Price leadership*	18
V	Alternative Theories of the Firm and Pricing Critical evaluation of Marginal analysis: Baumol's Revenue Maximisation – Williamson's Model of Managerial discretion – Marries Model of Managerial enterprise – Cyert and March Behavioural Model - Full cost pricing – *Bain's limit pricing theory*	18
VI	Current Trends (For CIA only) – Contemporary developments related to the course during the semester concerned.

Course Outcomes		
Upon successful completion of this course, the student will be able to:		
CO No.	CO Statement	Cognitive Level (K-Level)
CO1	Recognize the cardinal and ordinal approach	K1,K2
CO2	Describe theory of production	K3
CO3	Analyze the price and output determination under different market situations	K4
CO4	Validate the oligopoly models	K5
CO5	Derive ideas of theories of firm and pricing	K6

Relationship Matrix:

Course Outcomes (COs)	Programme Outcomes (POs)					Programme Specific Outcomes (PSOs)					Mean Score of Cos
	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2	PSO3	PSO4	PSO5	
CO1	2	3	3	2	2	2	2	3	2	3	2.4
CO2	2	3	2	2	3	2	2	3	2	2	2.3

					CIA	ESE	Total
I	23PEC1CC2	Core - II	6	5	25	75	100
Course Title		Advanced Macro Economics					

SYLLABUS		
Unit	Contents	Hours
I	Classical and Keynesian Economics Classical model of Full Employment: Say's law of market - Determination of Income and Employment: with saving and investment - without saving and investment and role of money and prices – Keynes criticism of Classical model – Keynesian theory of Employment – Keynesian view on involuntary unemployment – Money Wage Rigidity and *Great Depression*	18
II	Theories of Consumption Function *Consumption puzzle*: Kuznets's findings - Absolute Income Hypothesis- Relative Income Hypothesis - Permanent Income Hypothesis - Life cycle hypothesis.	18
III	Integration of Goods and Money Markets *Link Between Goods market and Money market* - IS-LM model: Goods market Equilibrium – Money market Equilibrium – Simultaneous Equilibrium on Goods market and Money market – Explaining roles of Fiscal and Monetary Policies using IS-LM Curve model.	18
IV	Inflation and Business Cycle Inflation: Causes – Effects – Controlling measures – Business Cycle :Features – Causes - Controlling measures – Phillips Curve – *Deflation*	18
V	Modern Macro Economics *Supply side Economics* – Basic Propositions of Rational Expectations Hypothesis – Main tenets of New Classical Macro Economics – Features of New Keynesian Economics.	18
VI	Current Trends (For CIA only) – Fiscal and Monetary policy-Inflationary trends- Economic recession-Policy prescriptions of different schools of economics.

Course Outcomes		
Upon successful completion of this course, the student will be able to:		
CO No.	CO Statement	Cognitive Level (K-Level)
CO1	Recall the Basic ideas and concepts of Different schools of Economics.	K1,K2
CO2	Apply the technical attributes of consumption function. Make use of the ISLM frame work to examine the impact of macro-Economic policies.	K3
CO3	Distinguish the demand and supply side factors causing economic instability.	K4
CO4	Evaluate the policy prescriptions of Different schools of Economics.	K5
CO5	Predict the expectations and government moves about the future economic events.	K6

Relationship Matrix:

Course Outcomes (COs)	Programme Outcomes (POs)					Programme Specific Outcomes (PSOs)					Mean Score of COs

Semester	Course Code	Course Category	Hours/ Week	Credits	Marks for Evaluation		
					CIA	ESE	Total
I	23PEC1CC3	Core - III	6	5	25	75	100
Course Title Environmental Economics							

SYLLABUS		
Unit	Contents	Hours
I	Economy and Environment Inter Linkages Economy and Environment Inter linkages: The natural environment and human economy: the Neoclassical economics perspective - The natural environment and human economy: An ecological perspective – Material Balance Principle - Effects of Economic Development on Environment – Atmospheric pollution and its effects – Marine pollution – Deforestation – Desertification – Hazardous wastes – Climate changes – Decline of Bio-diversity. *Environmental quality costs of Economic growth*	18
II	Economics of Environmental Resources Economic Efficiency: The optimal trade- off between Environmental Quality and Economic Goods - Classification of Goods - Market failure in optimal allocation of resources – Common property Resources and the economic problem – Environmental Externalities and their economic consequences - *Solutions to externality*	18
III	Economics of Environmental Regulations Liability Law: Meaning – Environmental regulation through liability laws – its advantages and disadvantages. Property rights or Coasian approach: Coase solution, its advantages and disadvantages. Emission standards: Policy tool to control pollution – Cost effectiveness of Emission Standards – *Advantages and disadvantages of Emission standards (Command and Control Approach)*	18
IV	Environmental Regulations Through Fiscal Techniques and Market Based Approach Effluent charges: Pollution control through Effluent charges – Optimal level of effluent charges – Effluent charges and pollution control technology – Advantages and disadvantages of Effluent charges. Subsidies – Comparison of Effluent charges and Subsidies. Transferable emission permits (Carbon Trade): Meaning – Working of Transferable emission– *Advantages and disadvantages of market based approach.*	18
V	Sustainable Development and Environmental Issues in India Sustainable Development: Meaning – Definitions- Component – Rules – Indicator of Sustainability – Economic instruments for promoting Sustainable Development. Sustainable Development Goals - Environmental Issues in India - Governmental Initiatives to Tackle Environmental Degradation - Challenges in Attaining SDGs for India - *The Sustainable Development Goals Report 2022*	18
VI	Current Trends (For CIA only) – Contemporary developments related to the course during the semester concerned.

Course Outcomes		
Upon successful completion of this course, the student will be able to:		
CO No.	CO Statement	Cognitive Level (K-Level)
CO1	Understand the concepts related to Environmental Economics	K1, K2
CO2	Identify the global, national and local level environmental problems	K3
CO3	Apply environmental theories in solving environmental issues	K4
CO4	Explain the environmental quality and the role of stakeholders to improve the environmental quality	K5
CO5	Compile and prepare an environmental policy	K6

Relationship Matrix:

Course Outcomes (COs)	Programme Outcomes (POs)					Programme Specific Outcomes (PSOs)					Mean Score of COs

					CIA	ESE	Total
I	23PEC1CC4	Core - IV	6	5	25	75	100
Course Title		Entrepreneurial Development					

SYLLABUS		
Unit	Contents	Hours
I	Basic Concepts and Functions of Entrepreneur Entrepreneur: Meaning, Concept, functions and classifications– Characteristics of entrepreneur –Nature and importance of entrepreneur – types of Entrepreneur – Entrepreneurial traits – Entrepreneurial Mobility – factors affecting Entrepreneurial growth: Economic and Non-economic factors -Entrepreneurial systems – *Women entrepreneurs*	18
II	Entrepreneurship and EDPs Institutions for entrepreneurship development –Entrepreneurial Development Programmes (EDPs): Need– Objectives – phases and Evaluation– Motivation – Motivating factors- Achievement Motivation – *Entrepreneurial Training: objectives, Importance and Methods*	18
III	Project Project: Meaning, Identification, Selection, Classification, project formulation - Project Report: Significance – Project Design –Project Appraisal – Product Design – *Production Design*	18
IV	Institutional Finance and Entrepreneur Institutions and entrepreneurial Development: consultancy organizations, financial institutions –Development financial institutions - MSMEs – Start-up registration–DIC – *TIIC*	18
V	Financial Analysis Financial Analysis: Meaning – Ratio Analysis- Investment Analysis - Break Even Analysis – Profitability Analysis - Social Cost-Benefit Analysis – Quality control – Small business Technology- *Budget and Planning Process*	18
VI	Current Trends (For CIA only) – Contemporary developments related to the course during the semester concerned.

Semester	Course Code	Course Category	Hours/ Week	Credits	Marks for Evaluation		
					CIA	ESE	Total
I	23PEC1DE1A	DSE - I	6	4	25	75	100
Course Title		Mathematical Applications in Economic Analysis					

SYLLABUS		
Unit	Contents	Hours
I	Straight Line Straight line – two-point, Slope – Point, Intercept Slope and Two intercepts, slope point and intercept formula – Application to Demand and supply functions – equilibrium price and quantity - Quadratic equations and solution – *Break Even analysis*.	18
II	Derivatives Rules of differentiation – I order and II order differentiation – Application to elasticities, marginal concepts – Maxima and minima. –Maximization of profit, revenue, sales and utility-Minimization of cost - *Multi product firm*.	18
III	Partial Derivatives Technique of partial differentiation – Cross Elasticity - Application to production function – monopoly- Price Discrimination – duopoly – revenue, cost and profit functions (simple problems) - *multi product firm*	18
IV	Integration Rules of integration – Application to consumer's surplus and producer's surplus – costs and revenues - *elasticity of demand*.	18
V	Matrices Basic concepts and operations on matrices – determinants – Cramer's rule – Matrix inverse – Input – Output analysis - * system of linear equations*.	18
VI	Current Trends (For CIA only) – Contemporary developments related to the course during the semester concerned.

Semester	Course Code	Course Category	Hours/ Week	Credits	Marks for Evaluation		
					CIA	ESE	Total
I	23PEC1DE1B	DSE - I	6	4	25	75	100
Course Title		Financial Economics					

SYLLABUS		
Unit	Contents	Hours
I	Introduction History, Scope and basic Concepts of financial economics – finance and financial economics - Characteristics of financial transaction – relevance of time and space, risk and reward relationship - Characteristics financial instruments – main types of financial instruments – definitional introduction - *Composition of and characteristics of financial markets*	18
II	Basics of Financial Calculation Compounding - Present Value and discounting - Volatility and its measurement - Rates of return, present value of returns - Annuities, their present and future values - *Basic idea of risk measurement*	18
III	Interest Rates Meaning and types – system – fixed and flexible, regulated and markets determined, types on the basis of time parameter- Theories of determination of interest rates - Keynesian and monetaint, interest rates and inflations rates - Term structure of interest rates, yield curve - Risk free rates - *Methods of charging interest rates, by Banks and other financial institutions*	18
IV	Valuations of Financial Assets. Principles of market valuations. Arbitrage and the law of one price - Accounting measures of value - Valuations of Banks - Role of information in market valuation – efficient market hypo thesis- the lemons problem - valuations under asymmetric information adverse selection - Risk and market valuation - *Basic idea of Capital Asset Pricing model*	18
V	Pricing of Derivatives Basic idea of derivatives - Pricing theories of futures - Pricing of options and contingent claims, Binomial method and Black - Scholars model - *Valuation of warrants and rights*	18
VI	Current Trends (For CIA only) – Contemporary developments related to the course during the semester concerned.

					CIA	ESE	Total
II	23PEC2CC5	Core - V	6	5	25	75	100
Course Title Advanced Micro Economic Analysis – II							

SYLLABUS		
Unit	Contents	Hours
I	Individual Behaviour under Uncertainty Choice involving risk – St. Petersburg paradox and Bernoulli's Hypothesis – N-M utility index under risky situation - Attitude towards Risk – *Friedman-Savage Hypothesis*	18
II	Pricing of Factors of Production Functional versus Personal distribution – Marginal Productivity Theory – Modern theory of pricing of factors of production – RICARDIAN theory of income distribution – *Marxian theory of distribution*	18
III	General Equilibrium Theory Interdependence in the economy – The Walrasian system – Existence, uniqueness stability of equilibrium – *Static properties of a general equilibrium state*	18
IV	Welfare Economics Criteria of social welfare – Pareto optimality, Kaldor, Hicks and Scitovsky criterion – Maximisation of social welfare – *Welfare Maximisation and perfect competition - critique and extension*	18
V	Market with Asymmetric Information Introduction-The Market for Lemons Asymmetric Information and the Market failure-The Adverse Selection Measures Adopted to Solve the Problem of Adverse selection- The Insurance Market and Adverse selection. The problem of Moral Hazard- Moral Hazard and Allocative Inefficiency- Market signalling - The Principal-Agent Problem in public enterprises - *Efficiency Wage theory.*	18
VI	Current Trends (For CIA only) – Contemporary developments related to the course during the semester concerned.

Course Outcomes		
Upon successful completion of this course, the student will be able to:		
CO No.	CO Statement	Cognitive Level (K-Level)
CO1	Recall the basic concepts of Money and Monetary Policy. Relate the money supply with price level and value of money	K1,K2
CO2	Apply the Quantitative and Qualitative tools to analyse the inflationary trends.	K3
CO3	Compare the policy differences between monetarism and Keynesianism	K4
CO4	Explain the relationship between money supply and Bop and Budget deficits. Evaluate the Central Bank's sterilization Operation in managing money supply.	K5
CO5	Discuss the Optimum Portfolio model by using Tobin and Boumol Approaches.	K6

Relationship Matrix:

Course Outcomes (COs)	Programme Outcomes (POs)					Programme Specific Outcomes (PSOs)					Mean Score of COs
	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2	PSO3	PSO4	PSO5

					CIA	ESE	Total
II	23PEC2CC7	Core - VII	6	5	25	75	100
Course Title		International Economics					

SYLLABUS		
Unit	Contents	Hours
I	Introduction and Theories International Economics – Scope - International Trade- *importance*-arguments for and against - Factor Price Equalization Theorem - International Product Life Cycle Theory, Theory of Technological Gap	18
II	Measuring the Gains of Trade Concepts of terms of trade - unfavourable trend in terms of trade for developing countries–Partial and *General Equilibrium Analyses*. Effects of tariffs under partial equilibrium - Non-tariff barriers to trade. (Observation Record of Volume, Composition and Direction of Export and Imports of India)	18
III	Balance of Payment Balance of Trade - Balance of Payments - Components – Measuring Deficit or Surplus - Process of Adjustment through Exchange Rate Depreciation – Devaluation and *BOP Adjustment* - J-Curve Effect.(Observation Record of Components of Balance of Payment of India)	18
IV	International Monetary System Bretton Woods Monetary System- Emergence and Collapse. International Liquidity and Reserves – Nature, Size and Distribution- *Reasons for Shortage*. International Capital Movements –Influencing Factors – Foreign Direct Investment - Case for and against. Foreign Portfolio Investment - Case for and against.	18
V	International Institutions IMF, IBRD, UNCTAD and WTO – Origin, Objectives, Functions and Organizational Structure - Developments in Foreign Exchange Markets, Euro-Currency Markets, and *International Bond Markets* - International Debt Crisis.	18
VI	Current Trends (For CIA only) – Country Groups - G77, G8 and G20

Course Title		Evolution of Economic Thought					

SYLLABUS		
Unit	Contents	Hours
I	Ancient Economic Thought Characteristic features and Significance of ancient economic thought – Contributions of early thinkers: Characteristics of Hebrew economic thought - Greek economic thought: Plato's thoughts – Aristotle's economic ideas – Xenophon's thoughts – Contributions of the Greek stoics and epicureans – Features of the Greek thought - Contributions of Roman thinkers – roman jurists' views - Economic thought in ancient India: Chief characteristics of ancient Indian economic thought. Economic ideas of Kautilya's Arthashastra – *Economic ideas of Thiruvalluvar*.	18
II	Medieval and Pre- Classical Thought Characteristics of Early Medieval Social Order - Characteristics of Later Medieval Society – St. Thomas Aquinas Views - Nicole Orsme's ideas – Contribution of early Muslim Scholars to Economic Thought: Abu Yusuf, Gazali, Ibn Themiah, and Ibn Khaldun - Economic Thought in Medieval India. Pre-Classical Economic Thought Mercantilism: Factors, Concepts of Mercantilism, Thomas Mun, Criticism of Mercantilism - Physiocracy: Factors, Ideas of Physiocrats – Quesnay – Tableau Economique – *Critical Estimate*.	18
III	Classical Economic Thought Classical Economic Doctrines: Individualism – Harmony of Interests – Liberalism – Free Trade – Full Employment - Classical Objectivism - *Deductive Analysis*.	18
IV	Reactions against Classicism – I The Nationalistic Critics: Adam Heinrich Muller – Friedrich List – *Critical assessment of National School*. The German Historical Critics Circumstances leading to Historical School- Characteristics of Older Historical School: Wilhelm Roscher – Bruno Hildebrand – Karl Knies – Characteristics, Critical ideas of Younger Historical School: Gustav Schmoller – *Werner Sombart– Positive ideas and Estimate of Historical School*. Institutionalism Institutionalism and Classism – Characteristic features of Institutionalism – Economic ideas of Veblen.	18
V	Reactions against Classicism – II The Socialistic Critics Evolution of Social Thought – Early socialists: St. Simon – Sismondi – Utopian Socialists: Robert Owen – *State Socialists: Karl Rodbertus* – Scientific Socialists: Karl Marx. The Subjectivism and Marginalism Factors giving rise to Subjectivism or Marginalism – Basic ideas of Marginalism – Hermann Heinrich Gossen – *William Stanley Jevons*. The Keynesian Revolution Keynesian under Employment Equilibrium – Role of Government – Keynes and Classical Economists.	18
VI	Current Trends (For CIA only) – The role of banks in the economy, particularly during financial crises by the Noble laureates Ben Bernanke, Douglas Diamond and Philip Dybvig (2022),

					CIA	ESE	Total
II	23PEC2DE2A	DSE - II	6	4	25	75	100
Course Title		Statistical Methods for Economic Analysis					

SYLLABUS		
Unit	Contents	Hours
I	Measures of Central Tendency Meaning of average – Types of average: arithmetic mean (for raw data, ungrouped frequency distribution and grouped frequency distribution), median (for raw data, ungrouped frequency distribution and grouped frequency distribution), mode (for raw data, ungrouped frequency distribution and grouped frequency distribution), Geometric mean, Harmonic Mean– quartiles– *deciles – percentiles*.	18
II	Dispersion Meaning of dispersion – types of dispersion: range, quartile deviation, mean deviation, Standard Deviation and Variance – coefficient of variation – combined standard deviation – *Lorenz curve*.	18
III	Correlation and Regression Concept of correlation – types of correlation –simple correlation – Karl Pearson’s coefficient of correlation – partial correlation – multiple correlation – Spearman’s rank correlation coefficient – properties and uses of correlation. Meaning of regression – simple and multiple linear regression – properties of regression coefficients – *coefficient of determination*.	18
IV	Sampling Population and sample- Parameter and statistic- (Census method and sampling method of Data collection); Objects of Sampling- Methods of Sampling- Random and Non- Random; Techniques of sampling under each method- Sampling Error and Non-Sampling Error-*Sampling distribution of a Statistic*.	18
V	Testing of Hypothesis Formulation of Statistical Hypothesis; Testing of Hypothesis-Null Hypothesis and Alternative Hypothesis-Stages in Hypothesis testing-Types of Error in Hypothesis testing- Type I error and Type II error-Level of Significance and confidence coefficient-Critical region or rejection region; Two tailed test and one-Tailed Test; Computation of Test statistic and significance Test-small sample test-‘t’ Test- χ^2 test- F test; Large sample test- Z test; *Analysis of Variance*.	18
VI	Current Trends (For CIA only) – Contemporary developments related to the course during the semester concerned.

					CIA	ESE	Total
III	23PEC3CC10	Core - X	6	5	25	75	100
Course Title Managerial Economics							

SYLLABUS		
Unit	Contents	Hours
I	Nature and Significance of Managerial Economics Managerial Economics: Meaning, Nature and Scope, Salient Features and Significance of Managerial Economics – Integration of Economics Decision in Science and Business Management. – Role of a Managerial Economist - * Responsibilities of a Managerial Economist*	18
II	Demand Forecasting Demand forecasting: Meaning and Concept – Factors involved in demand forecasting – Purposes of Forecasting: Short-term forecasting and Long-term forecasting. Determinants of demand forecast: Non-durable consumer goods, durable consumer goods and Capital goods. Methods of forecasting: Survey of Buyers’ intentions – Collective Opinion – Trend Projections – Economic Indicators (Theoretical explanation only) – controlled experiments. Forecasting demand for new products – *Criteria of a good forecasting method*	18
III	Pricing Methods, Profit Policies Full Cost Pricing – Target Pricing – Marginal Cost Pricing – Going Rate Pricing – Customary Prices – Limit Pricing. Profit Maximisation – Reasons – Alternative Profit Policies – Aims of Profit Policies – Break-Even Analysis – assumptions – Limitations – *Importance of Profit Policies*	18
IV	Production Function and Capital Management Production function: concept - short run analysis of production function – Law of variable proportions - three stage of production. Capital Management: Capital Budgeting – Meaning – Need – Determining the size of the capital budget – Appraising project profitability: Accounting Rate of Return – Internal Rate of Return – *Net Present Value*	18
V	Input-Output Analysis Input-Output Analysis: Meaning - Features – Assumptions – Types and Components of Input-Output model - Input-Output Framework - Uses of Input-Output Analysis - *Limitation of Input-Output Analysis*	18
VI	Current Trends *(For CIA only) – Contemporary developments related to managerial economics during the semester concerned.

SYLLABUS		
Unit	Contents	Hours
I	Theories of Development – I Adam Smith's theory – David Ricardo's theory – Mill's theory – Malthus theory - Karl Marx's theory – Schumpeter's theory – *Keynes' views on development*	18
II	Theories of Development – II Balanced and Unbalanced growth theories - Big push theory – Leibenstein's Theory of Critical Minimum Effort, *Nelson's theory* - Rostow's growth theory - Kremer's O-Ring theory of development	18
III	Theories of Development – III Nurkse theory - Utilization of surplus man power theories: Lewis theory- Fei-Ranis theory– *Harris- Todaro model*	18
IV	Models of Economic Growth – I Harrod-Domar Model, Joan Robinson Model, *Meade Model*, Solow Model - Krugman's theory	18
V	Models of Economic Growth – II Kaldor Model of distribution, Romer's endogenous growth model, Jorgenson model –Amartya Sen's capability theory approach - *Pasinetti Model*	18
VI	Current Trends * (For CIA only) – Contemporary theories of development and growth	

..... Self Study

Course Outcomes		
Upon successful completion of this course, the student will be able to:		
CO No.	CO Statement	Cognitive Level (K-Level)
CO1	Describe the process of economic development under Classical and Keynesian thought.	K1, k2
CO2	Evaluate the theories of Economic Development relevance to third world countries (Labour abundant countries).	K3
CO3	Examine the theories of Economic growth with due importance to capital.	K4
CO4	Distinguish the strategies of economic growth and development.	K5
CO5	Formulate new strategies for economic development.	K6

Relationship Matrix:

Course Outcomes (COs)	Programme Outcomes (POs)					Programme Specific Outcomes (PSOs)					Mean Score of COs
	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2	PSO3	PSO4	PSO5	
CO1	2	3	3	2	2	2	2	3	2	3	2.4
CO2	2	3	2	2	3	2	2	3	2	2	2.3
CO3	3	2	2	2	1	2	1	3	3	2	2.1
CO4	1	3	2	3	2	2	2	2	2	3	2.2
CO5	2	2	3	2	1	3	3	2	2	2	2.2
Mean Overall Score											2.2
Correlation											Medium

Mean Overall Score	Correlation
< 1.5	Low
≥ 1.5 and < 2.5	Medium
≥ 2.5	High

Course Title Computer Applications in Economics – Theory							

SYLLABUS		
Unit	Contents	Hours
I	MS Office: Word, Power Point, OneNote and Outlook Components of MS Office - MS Word - Features –Home, Insert, Page layout, References, Mailings, Review View and Table Design menus - MS Power Point: Features – Formatting Chart, Font, Slide Design – Animation scheme – slide show- MS OneNote – MS Outlook.	9
II	MS Office: Excel Features-Spreadsheets- meaning and purpose – Tool bars - Formula Bar :INDEX, IF AND, IF OR, SUMIF and CONCATENATE formula – Sorting and Filtering – Charts : Conditional Doughnut Progress Chart, Interactive Waterfall Chart, Variance on Clustered Charts and Stacked Bar with Dynamic Data Labels – Pivot table – Vlookup, Hlookup - Data Analysis: Estimation of Descriptive Statistics, Demand function and Supply function - Data Simulation -Time Series Analysis.	9
III	Data Analysis Using SPSS General Features and Uses of SPSS - Naming variables - Coding and Recoding of data - Arithmetic calculations with in variables- Descriptive Statistics: Frequencies, Descriptive, Explore, Cross Tabulation - Compare Means: One Sample T- test, Independent Sample T – test, Paired Sample T test, One way ANOVA – Correlation : Bivariate and Partial - Regression : SLR and MLR.	9
IV	Computer Application in Economics – I Demand Estimation and Elasticity: Calculate Price and Income Elasticity of Demand - Estimation of Cobb Douglas and CES production function, Tronslog production function - Curve fitting: Quadratic curve estimation, Pareto curve power model, Philips curve inverse model and Engel curve.	9
V	Computer Application in Economics – II Time series, Forecasting and growth rates – Cost and Revenue functions – Logistic Curve Estimation, Quadratic Cost Curve Estimation, Cubic Cost Curve Estimation - Break-Even Analysis- Profit Maximisation – Discriminant analysis.	9
VI	Current Trends (For CIA only) – Contemporary developments of computer applications in economics

Course Outcomes		
Upon successful completion of this course, the student will be able to:		
CO No.	CO Statement	Cognitive Level (K-Level)
CO1	Students will be able to evaluate various methodology to analyze and apply data using MS Office.	K1
CO2	Students will be able to develop the ability to create and apply basic to complex formulas and functions to perform calculations and solve real-world problems.	K2
CO3	students will be well-equipped to handle various types of data analysis tasks using SPSS	K3
CO4	Students will be able to demonstrate and built the models using SPSS	K4
CO5	Students will be able to perform Time series, logistic regression, and Discriminant analysis in SPSS and interpret the results.	K5

Relationship Matrix:

Course Outcomes (COs)	Programme Outcomes (POs)					Programme Specific Outcomes (PSOs)					Mean Score of COs
	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2	PSO3	PSO4	PSO5

Course Title		Computer Applications in Economics – Practical					

SYLLABUS		
Unit	Contents	Hours
I	MS Office: Word & Power Point 1. Preparation of bio-data. 2. Formatting Documents for newspaper (model). 3. Creation of Invitation card. 4. Mail Merge. 5. Creation of mathematical formula using Formula Editor. 6. Creation of Statistical formula using Formula Editor. 7. Creation of table and chart using MS word. 8. * Preparation of the Power Point Slides with the subject matter of Economics*	9
II	MS Excel 1. Preparation of the Mark Statement. 2. *Preparation of the Pay Bill and Invoice Bill*. 3. Insertion of the Conditional Doughnut Progress Chart. 4. Interactive Waterfall Chart. 5. Variance on Clustered Chart. 6. Stacked Bar with Dynamic Data Labels. 7. Calculation of Average, median, mode and standard deviation. 8. Estimation of Demand function and Supply function. 9. Calculation of Time Series Analysis using MS Excel.	9
III	SPSS in Statistical Applications 1. Calculation of Descriptive Statistics 2. Draw the Graph. 3. Calculation of One way ANOVA. 4. Calculation of One Sample T- test. 5. Calculation of Independent Sample T – test. 6. Calculation of Paired Sample T test. 7. Calculation of Correlation. 8. Calculation of Partial Correlation 9. Calculation of Simple Linear Regression. 10. Calculation of Multiple Linear Regression.	9
IV	Computer Application in Economics – I 1. Calculation of Price Elasticity of Demand. 2. Calculation of Income Elasticity of Demand. 3. Estimation of Cobb Douglas Short run production function. 4. Estimation of Cobb Douglas Long run production function. 5. Estimation of Tronslog production function. 6. Estimation of CES production function. 7. Quadratic cost curve Estimation. 8. Pareto curve power model estimation. 9. Phillips curve inverse model estimation. 10. Engel curve and income elasticity.	9

V	Computer Application in Economics – II 1. Estimation of Linear Trend. 2. Estimation of Compound Growth rate. 3. Logistic Curve Estimation. 4. Quadratic Cost Curve Estimation. 5. Cubic Cost Curve Estimation. 6. Determination of the Break-Even Point. 7. Break-Even Quantity using Linear and Non-Linear Relationship. 8. Break-Even Quantity using Non-Linear Relationship. 9. Profit Maximization using Linear and Non-Linear Relationship. 10. Profit Maximization using Non-Linear Relationship.	9
VI	Current Trends (For CIA only) – Contemporary developments of computer applications in Economics

					CIA	ESE	Total
III	23PEC3DE3A	DSE - III	6	4	25	75	100
Course Title		Econometrics					

SYLLABUS		
Unit	Contents	Hours
I	Introduction to Simple Linear Regression Models Stages in methodology of econometric methods. Scatter plot. Simple Linear Regression Model – Meaning – specification of population and sample regression function – estimation of regression coefficients. Prediction of Y – estimating error values. Goodness of fit measures – Co-efficient of determination (r^2) – estimation using observed and intermediate values. Estimating sum of squares of errors. Computing standard error of individual regression coefficients. Testing of hypothesis t test and F test	18
II	II Multiple Linear Regression Model Multiple Linear Regression Model - Specification of population and sample regression function– Assumption regarding the behaviour of the observations of explanatory variables – No multicollinearity. Estimation of regression coefficients using sample observations and intermediate values. Co-efficient of multiple determination (R^2), adjusted R^2 and its properties. Testing of hypothesis under multiple regression - t test (using intermediate values) - F test (using intermediate values)	18
III	Dummy Variable Dummy Variables- Nature of Dummy Variables- ANOVA Models, ANCOVA Models- Uses of Dummy Variables Seasonal Analysis-*Piecewise Linear Regression*. Qualitative response Regression Model- Linear Probability Model, Logit Model, Probit Model, Tobit Model. (Specification of models and components only)	18
IV	Assumptions and Violations Assumptions regarding error values – Homoscedasticity and No-autocorrelation. Assumption regarding the behaviour of the observations of explanatory variables – No multicollinearity. Assumption Violations – Heteroscedasticity, autocorrelation and multicollinearity - detection (by crude methods), causes, consequences and remedial measures	18
V	Timeseries Econometrics Timeseries Econometrics-Stationarity-Non-stationarity-stationarity testing using mean, standard deviation and auto-regressive methods. Concepts and equation expressions of Stationary and Non- Stationary stochastic processes, Unit root stochastic process, Trend stationary and difference stationary stochastic processes, Integrated stochastic process. Properties of Unit root tests – *Cointegration Model*.	18
VI	Current Trends (For CIA only) – Contemporary developments related to econometrics during the semester concerned.

					CIA	ESE	Total
IV	23PEC4CC15	Core - XV	6	5	25	75	100
Course Title Comparative Economic Systems							

SYLLABUS		
Unit	Contents	Hours
I	Comparative Economic Systems and Pre Capitalist Economic System Economic System: Meaning, Definitions, Features – Bases for Comparison of Economic Systems – *Importance and Problems of Studying Comparative Economic Systems* - Feudalism: Meaning, Definition and features - Organisation of feudal society – Mode of production under feudalism – Breakdown of Feudalism – Causes responsible for the breakdown of feudalism – Feudalism and Capitalism.	18
II	Capitalism Theory of Capitalism - Development and Stages of Capitalism: Merchant Capitalism, Industrial Capitalism, Finance Capitalism, Guided Capitalism – Achievements and Failures of Laissez faire Capitalism – The problem of Unemployment under Capitalism: Emergence of Unemployment, Remedies of Unemployment - The problem of Monopoly under Capitalism: – Price mechanism under Capitalism – Consumer sovereignty under capitalism - Transformation of Capitalism. * Capitalism in U.S.A. and Future of Capitalism*	18
III	Socialism Theory of Socialism – Evolution of Socialism: Utopian and Scientific Socialism, Anarchistic Socialism, Fabian Socialism, Syndicalism, Guild Socialism, Christian Socialism, Authoritarian Socialism (Communism), Democratic Socialism – Similarities and Differences between Socialism and communism - The problem of Allocation of Resources under Socialism - The problem of Incentives under Socialism – Socialism in Advantages and Shortcomings of Socialism– Reforms in Socialism: Market Socialism. *Socialism in the U.S.S.R*	18
IV	Mixed Economy Theory of Mixed Economy – Features of Mixed Economy – Meaning of Public Sector and Private Sector – Factors responsible for the expansion of Public sector – Meaning of Privatisation – Privatisation of Public Enterprises - Merits and Demerits of Mixed Economy – Conditions necessary for the success of Mixed Economy – Mixed Economy in India: Evolution, working and future of Mixed Economy. *An appraisal on Mixed economies in operation*	18
V	Alternative Economic Systems Convergence of capitalism and socialism- emerging new economic system - Gandhian ideas on economic system - fundamental principles: progress of all (Sarvodaya), raising standard of life (containment of wants), work is worship (bread labour), self-sufficient villages (grassroots development), production by masses (decentralization) – principles and appraisal of Gandhian trusteeship economy – trusteeship as an alternative to capitalism and communism. Islamic Economic System: Definition of Islamic Economics – Islamic worldview on Economic System - Basic Features of Islamic Economic System: Human Nature, Materialism, Ownership, Universalism – Islamic Approaches to Contemporary Economic Problems - *Differences between Islamic Economic System and Conventional Economic Systems*	18
VI	Current Trends (For CIA only) – Contemporary developments related to economic systems during the semester concerned.
