

## Plant Molecular Biology and Tissue Culture Lab:

This is being utilized for micro propagation, Organogenesis, Somatic Embryogenesis, Agrobacterium mediated gene transformation, Hairy Root culture and synthetic seed studies.

## Crystal growth & Nanomaterials Research Lab(CGNMRL)

This lab is being utilized for Growth of Non-linear optical crystals for laser application and synthesis of Nanomaterials for biomedical application.

Constant Temperature Baths with Cooling Facility

Vicker's Micro-hardness Tester

## Zoological Museum:
